

The ice rink

Functioning

Two teams compete on the ice rink using their hands and a ball of paper or a set of mini-hockey sticks.

Variants

- Change posture (play on all fours, on knees, standing)
- Without a goalkeeper, position yourself in different places and attempt shots on goal between the triangles.

Goals

- Coordination, dissociation
- Body and spatial organization

Educational games

- **Basic game:** If a goal is scored, the player must answer a review question for the point to be awarded.
- **The squares:** Write a number on each square. The player must pass the ball over a square and solve an equation containing that number.
- **The barrage shot:** 2 players take turns facing off. The teacher asks a question and the fastest to give the correct answer gets to take a penalty kick.
- **The game start:** The first team to make a sentence respecting the teacher's instructions starts with the ball.
